MOTION GRAPHICS SYSTEM · 03

Client Style
Brief

Fill one of these per client or per new editing style. It becomes the client's Style Profile (src/ReelKit/styles/client-name.ts) and is stored as system/styles/client-name.md. Everything not listed here follows the house rules in the Style Guide.

> Fastest way: send prompt 01 with the client's reference reel(s) and brand assets. Claude watches the references frame by frame and fills this brief for you to approve.

A. Client

Field	Answer
Client / brand name	
Niche and audience	
Platform (Reels, TikTok, Shorts)	
Speaker(s) and setting (studio colour, lighting)	
Reference reels (links or files)	
What they like about the references	
What they never want	
Brand assets supplied (logo, fonts, colours, product shots)	

B. Captions

Field	Reference reel value	Client value
Sans font + weight	Creato Display Medium	
Script / special font	Apple Garamond Bold Italic	
Regular word colour	#F3F3F3 warm white	
Accent (special words)	#3A7BFF	
Glow on special words	Yes, accent 55%	
Size (sans / script at 1080 wide)	36 / 78 px	
Default placement	Lower half, centred	
Animation	Word-by-word rise + fade + blur; script letter by letter; under 1.5 s	
Words per line	3 to 8	

C. Paper world (full and half screens)

Field	Reference reel value	Client value
Background look	White + casted shadow + grid	
Paper colour	#F4F2EE	
Grid	Thin grey, 54 px	
Casted shadow	Soft diagonal window panes	
3-tone palette	Near-black #141414 / off-white / #3A7BFF	

Field	Reference reel value	Client value
Object style	Glossy 3D, white rounded cards, soft shadows	
Text on paper	Sans ink + accent script	

D. On-screen UI

Field	Reference reel value	Client value
Card style	Dark glass, 72% black, radius 26	
Scale	75%	
Background treatment	Darken + blur lower half	
Recurring UI	1-2-3 chapter tracker	

E. Motion and camera

Field	Reference reel value	Client value
Easing	Fast then slow, no bounce	
Transitions into full screen	Circle / square reveal	
Camera	Track the action, slow zoom-out, snap to new angle; slow push-ins on A-roll	
Energy (calm / medium / high)	Medium	
Animations per minute	About 12	

F. Approval

Field	Answer
Test frame approved (date)	
Profile file	src/ReelKit/styles/client-name.ts
Notes for next edits	

How to analyse a new reference style (what Claude does in prompt 01)

1. Pull frames twice a second; make contact sheets with timestamps.
2. Write a shot list: time, line, scene type, what happens.
3. Sample exact colours from frames (background, accent, caption white).
4. Identify fonts by shape (sans: geometric / grotesk / humanist; script: serif italic / handwritten) and pick the closest free font.
5. Measure caption size and placement relative to the frame.
6. Describe motion: how words enter, easing, durations, camera moves, transitions.
7. Map every animation to the four categories and the four scene types.
8. Fill sections B to E, build one test frame per scene type, get approval.
